

## Weekly Minutes

---

12.00pm

All team members present.

Minutes taken by Caine.

- Code review/ fixed bugs
  - Command line version is now in a fully working state (Sans stat recording)
- Next steps:
  - Implement tests
  - Implement test logs
  - Implement stat recording
  - Add more comments to existing code
  - Review user stories: Reconsider cost with perspective of actually having coded
  - Link CLI version to database
  - Re package CLI version components to allow for shared use between this and online mode
  - Solidify understanding of online version over weekend before starting next sprint
  - Start planning and writing report
  - Make gui wireframes
  - Investigate protocol for closing online window. Quit application? Log stats?
